

EarPod Pro – Initial Setup (iPhone) and User Manual

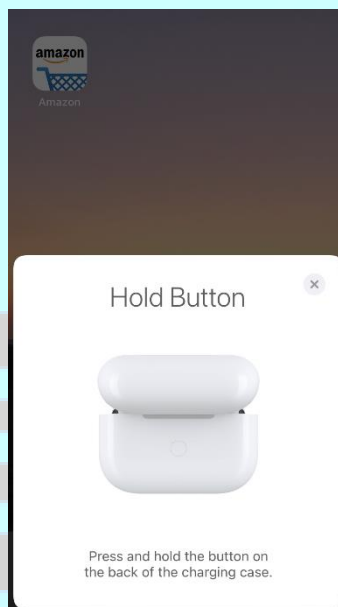

Box Contents: 1x Pair of EarPod Pros, 1x Charging Lead, 1x Manual, 2x Alternative EarBud covers

Initial Setup

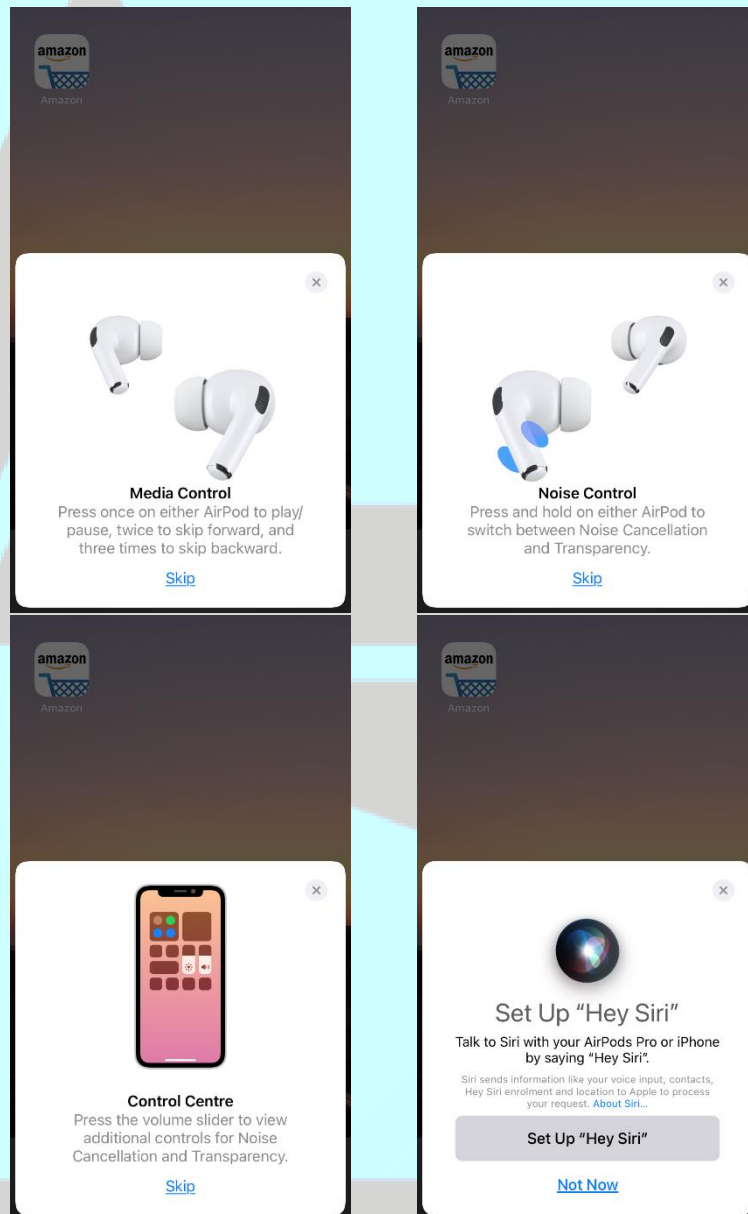

1. Unlock your iPhone and ensure Bluetooth is enabled
2. Open the EarPod Pro case and hold within a few inches of your iPhone

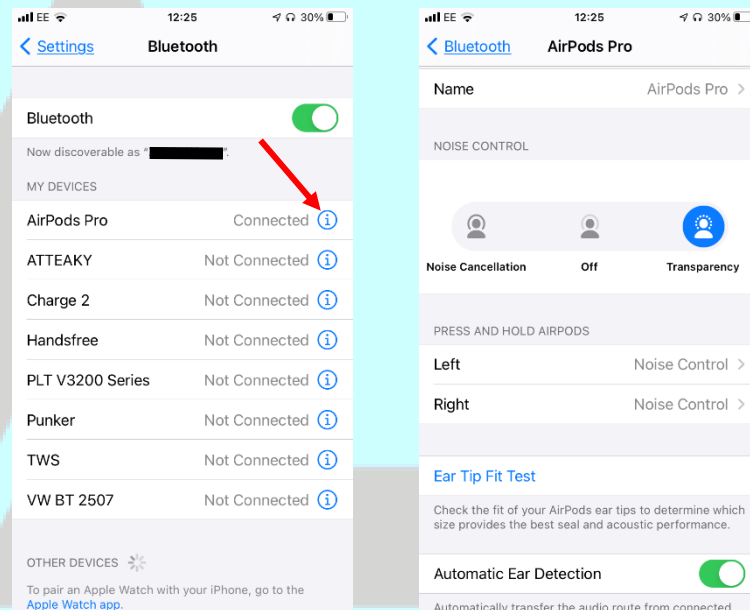

3. When prompted, hold the button on the back of the EarPod Pro case.

- Once the devices have paired, you will be shown some basic functionality. Please note that the Noise Control functionality is limited and this pop-up is controlled by the iPhone itself.

- Now you can customise the settings of your EarPod Pros. Firstly go to the Settings > Bluetooth and then select the i symbol for your EarPod Pros. You can then change the device name as well as various preferences.

- To check the battery level of your EarPod Pros and their case, simply open the case within a few inches of your phone. Do not remove the EarPod Pros from the case and wait a couple of seconds, you will then see the following pop-up
